## Navigation through the publication

Scrolling through the pages is possible by clicking on the arrow icons (**Next Page** and **Previous Page**), entering the page number in the upper left field, using the interactive **Table of Contents** or by clicking on the link on the content page itself (pages 3-5).

By clicking on the **Zoom** icon, a page zoom slider appears. Part of the page can be enlarged by double-clicking, or by tap-tap on a mobile device.

Scrolling is accompanied by sound, which you can turn off with the **Toggle Sound** icon at the bottom.

## Search engine

Clicking on the Search icon in the upper right corner opens the **Search** box with a list of pages where the search term is found. It is also a link to that page. The term can be the name or part of the name of the article, code or catalog number, as well as any word or several words that can be used to describe the requested article.

## Personal Notes

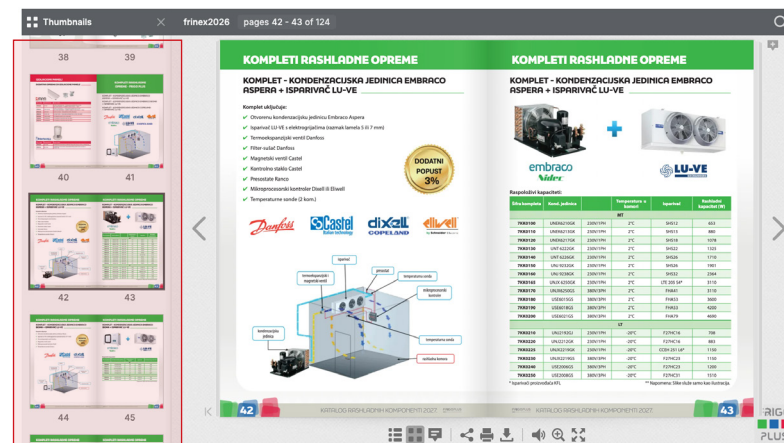

You can write your personal note on the desired page by clicking the **Add Note** button in the upper right corner. Choose a color for the note icon and write your note (you can drag and drop it anywhere on the page). To delete a note, you can click the note icon, click the text in it, and then click the trash can icon. To list all notes, click the **Notes** icon at the bottom.

The notes you add are only available in the browser in which you created them. If the flipbook is opened in another browser, the notes will not be available there. Notes also disappear if you delete your browser's cookies.

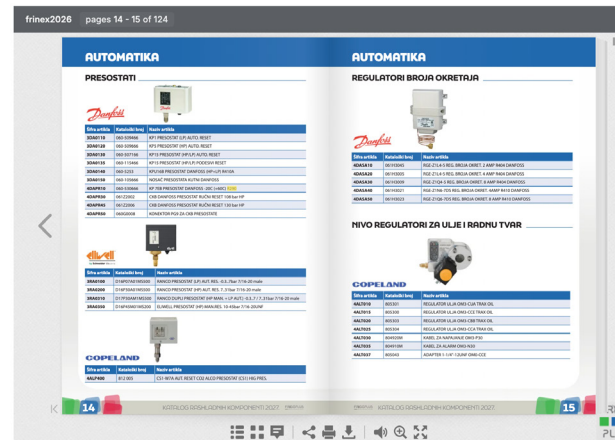

## Links

Links on the page are marked with a transparent blue background for one second.

Links in the content lead to the desired page, links to the partner logo lead to the partner's website. Links to an individual item lead to the same item in the web shop with a detailed description and price, and a link to a product group leads to the list of desired items in the web shop.
